KEY COMPETENCIES

- Software Engineer specializing in building scalable web and mobile applications for Fintech and healthcare domains. Skilled in React, Flutter, and Node.js with a strong focus on performance optimization, API integration, and clean architecture. Proven ability to deliver production-grade banking and financial applications

EDUCATION

Karachi University *2025 - in progress*

Master in Computer Science

Shah Abdullah Latif University

Bachelor of Science in Computer Science

TECHNICAL SKILLS

Programming Languages: JavaScript, Dart

Front-End Development: React.js, Next.js, Redux, Context API, Ant Design

Mobile Development: Flutter, React Native

Databases: MongoDB

Back-End Development: Node.js, Express.js

Tools Others: Git, Docker, REST APIs

WORK EXPERIENCE

Software Engineer — Codebase Technologies — Fintech **Aug 2020 – Present**

- Developed and maintained multiple banking and Fintech applications using Flutter and Dart, ensuring stable performance and responsive design.
- Built cross-platform mobile and web applications using React.js and React Native with Redux for efficient state management.
- Integrated RESTful APIs to enhance application reliability, data accuracy, and performance.
- Designed scalable architecture and implemented state management best practices for Fintech and healthcare applications.

PROJECTS

- **Tabeeby App**, Full-stack online doctor appointment platform (Web Mobile) Web: React.js + Ant Design, Mobile: React Native, Redux for state management Improved user experience and performance across platforms
- **Gold Drive App** , Built frontend of online ride-booking platform using React.js and Redux Connected APIs using Axios for real-time data synchronization Delivered modern, responsive UI with Ant Design.
- **Dakter's App Web** , Designed and developed a responsive telemedicine platform using React.js and Redux. Enhanced UI/UX consistency through Ant Design. Integrated backend APIs for appointment booking and real-time updates.

- **Wink Banking App** , Developed multiple mobile banking apps using Flutter and Dart. Managed state with Provider, GetX, and River pod for stable app performance. Applied Material UI for consistent design and improved accessibility.
- **AAA Finance InterSwitch Banking Apps** , Created scalable mobile apps in Flutter for financial clients. Enhanced reliability through River pod and GetX-based state management. Focused on performance optimization and smooth API integration.
- **Raqami Banking Apps** , Built and maintained cross-platform banking applications using Flutter. Ensured responsive design and robust architecture. Implemented state management best practices to reduce bugs and crashes.
- **Ignite Banking Apps** , Built and maintained cross-platform banking applications using Flutter. Ensured responsive design and robust architecture. Implemented state management best practices to reduce bugs and crashes.
- **Audi Banking Apps** , Built and maintained cross-platform banking applications using Flutter. Ensured responsive design and robust architecture. Implemented state management best practices to reduce bugs and crashes.
